

PROF. DAVID G. HENRY, SR.  
Registered Patent Attorney and Patent Law Professor

I'd like to introduce **Professor David G. Henry**. In addition to teaching at Baylor Law School and in the Hankamer School of Business, Prof. Henry is a Law Firm Partner, doing **patent and trademark litigation** throughout the United States and internationally (usually traveling **AS PILOT**, flying himself to his meetings and court matters). He was designated as a "Super Lawyer" by a national magazine for each of the past several years.

Prof. Henry's beginnings were not as you might expect. Effectively dropping out of high school during his junior year, he worked on a loading dock through age 20, when, with a second chance given him by Baylor, he began studies here, ultimately going to Baylor Law School on scholarship.

Prof. Henry donates about 1/3 of his time to Baylor, **to honor those who mentored and believed in him**, and to **help future generations to understand that anyone can overcome any obstacle with faith, determination, love and wise mentoring**.

Part of that give-back relates to tonight's appearance. Prof. Henry has served the Greek community for many years, including as **Faculty Advisor** to **both** IFC and Panhellenic Chapters. Prof. Henry was *twice* named **Greek Advisor of the Year**, as **Baylor Student Government's Faculty Member of the Year**, and as recipient of the **Student Advocate Award by Baylor's Division of Student Life**.

Without further delay.... Professor Henry with a few comments about hazing.
